## Introduction

In response to the BSAFE rule regarding Paternoster keys left in the machine, we have developed a new automatic “Inactive → Off” safety switch that can be easily fitted. We have trialled it in the Scoresby store and it works well.

## How to use the machine

1. Insert the key
2. Turn to on
3. Turn to off
4. Straight away remove the key and put it back in your pocket
5. Machine is now ON as indicated by the blue light, and can be operated by pushing the UP or DOWN buttons
6. Pushing the UP or DOWN buttons anytime while blue light is on, resets the inactivity switch
7. After 30 seconds of inactivity, the machine will automatically turn off.

## Kit

We supply a kit with the following:

1. Timer
2. Indicating Light
3. Additional contact blocks for existing UP / DOWN switches
4. Wiring Instructions together with photos

The cost of each kit is \$299 plus GST. You will need to have it installed by your store electrician. We expect this to take about 90 minutes to 2 hours depending on their skill and experience. We can also arrange installation if you prefer.

The electrician needs to supply 2 cable glands and about 1.5 m of 3 core electric control cable.

We believe this will make machine operation safer!

NO risk of leaving the key in the machine unattended.

NO lost sales because team members are reluctant to risk leaving key in the machine.

To proceed, please fax or email your purchase order to:

Fax: 03 9798 7331

Phone: 03 9798 7191

We look forward to being of assistance!

Do no hesitate to give us a call for any questions you may have.
